

Relationship Chart

To determine the relationship of two descendants of a common progenitor, first think of the common progenitor, upper left box (Father). Then trace one descendant's link on the top line, the other descendant's link down the left column. Follow the line and the column to where they cross and read the relationship.

NOTE: Even though masculine gender has been used in this chart, the same rules apply to the feminine terms as well. Just plug in "daughter" for "son", "niece" for "nephew", etc.

Father	Son	Grand son	Great Grand son	2nd Great Grand son	3rd Great Grand son	4th Great Grand son	5th Great Grand son	6th Great Grand son	7th Great Grand son	8th Great Grand son
